SITUATION SUMMARY

Northern California

Monticello Vegetation Fire, Yolo County (Update)

Fire Information:

Highway 128 near the Monticello Dam, Winters, Yolo County

Per Cal OES Fire Duty Officer and ICS 209 dated 07/10/14 at 0500 hours:

- SRA
- Start Date / Time: 07/04/14 at 2130 hours
- 6,488 acres, 86% contained
- Total Personnel Committed: 933
- All evacuation orders have been lifted.
- No progression is expected, fire will be in mop up status.
- Two Cal OES Assistant Fire Chiefs are assigned with one Support Unit
- Public Safety Communications has two technicians assigned to the incident

SITUATION SUMMARY

Dry Vegetation Fire, Shasta County (Update)

Location: Hwy. 299E at Dry Creek Road, Bella Vista, Shasta County

Jurisdiction: SRA

Start Date/Time: 07/09/14 / 1345 hours

Per Cal Fire:

- 150 acres, Oak Woodland, 80% contained
- Forward progress stopped
- 1 outbuilding destroyed

Per Cal Fire website Dry Vegetation Fire, Shasta County

SITUATION SUMMARY

Cal EOC Incident – 2014 Drought

- SOC / Inland REOC remains activated in support of 2014 Drought
- [Current Drought Monitor Graphic Here](#)

WEATHER

WEATHER SYNOPSIS BY REGION:

NORTHERN CALIFORNIA AND CENTRAL COASTAL AREAS:

Eureka Weather:

Coastal areas of northwest California will continue to see nighttime and morning clouds and fog with some afternoon clearing. A series of weak systems will bring a slight chance of isolated storms over interior northwest California Mountains each afternoon into this weekend.

San Francisco Weather:

Typical summer weather can be expected through the work week with clouds overnight giving way to mostly sunny conditions during the day for most locations. High pressure will build back toward the area by the weekend leading to warmer conditions especially across inland areas.

CENTRAL CALIFORNIA AND SOUTHERN SAN JOAQUIN VALLEY

Sacramento Weather:

A few showers or thunderstorms will be possible over some mountain areas today and Friday. Otherwise mainly fair skies are expected through the middle of next week. Near normal temperatures expected through the remainder of this week then daytime highs a few to several degrees above normal next week.

Hanford Weather:

High pressure over the region will weaken the next few days, with temperatures cooling a few degrees daily through Friday. There will be slight chances of afternoon and evening showers and thunderstorms over the Sierra Nevada today as some monsoonal moisture moves into the area. High pressure will return this weekend for a warming trend for the first part of next week.

WEATHER

WEATHER SYNOPSIS BY REGION:

SOUTHERN CALIFORNIA:

Los Angeles Weather:

Low pressure off the west coast will bring near normal temperatures and night through morning low clouds and fog for the end of the week. A warm-up is expected for the weekend as high pressure expands west. Monsoon moisture may return by late in the weekend, bringing a slight risk of thunderstorms for the mountains and desert through early next week.

Extreme Southwestern California Including Orange, San Diego, Western Riverside and Southwestern San Bernardino Counties:

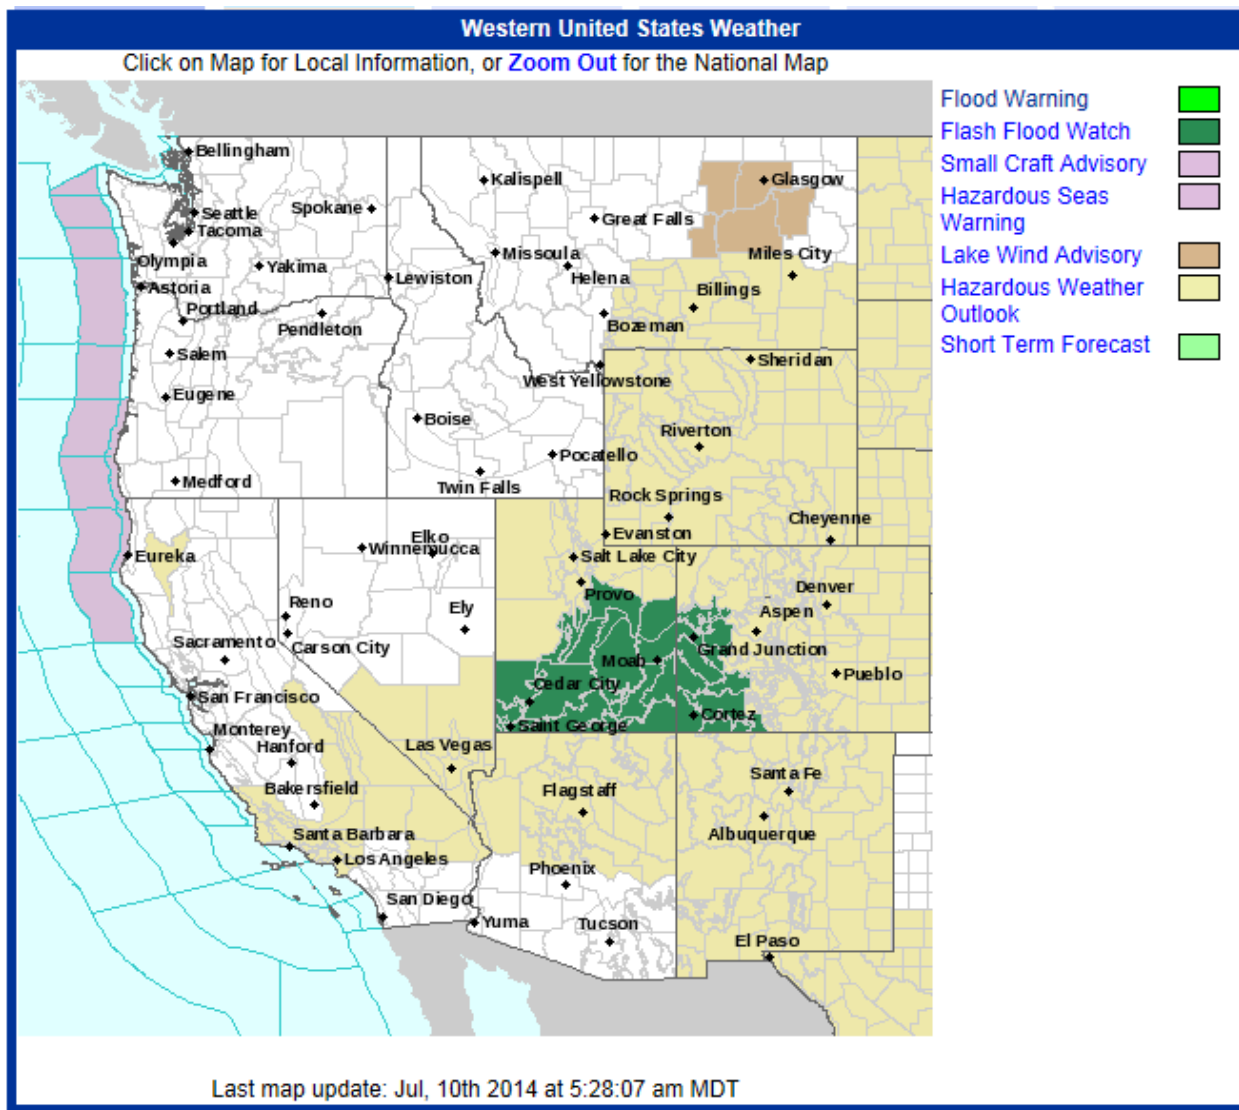

Monsoonal moisture has been slow decreasing west of the mountains since Monday, but has been slowly increasing in the lower desert areas and adjacent mountain slopes. This may be sufficient for an isolated thunderstorm over the higher mountains and adjacent upper desert areas this afternoon. Drier weather is then expected for Friday. For the weekend into early next week, monsoonal moisture will return, possibly sufficient for thunderstorms Sunday afternoon, and more likely for Monday into Tuesday with chances continuing through mid-week. Otherwise, high pressure will bring warming for the weekend with slight cooling for early next week as the monsoonal moisture increases. The marine layer will keep coastal areas cooler with areas of night and morning coastal low clouds and fog becoming patchier next week.

Southeast California Weather:

Monsoon flow will be disrupted somewhat this weekend with less thunderstorm activity than seen the past week. With this temporary lull in monsoon activity, temperatures across the region will warm well into the above normal category. Moisture should begin to surge back north early next week allowing more pervasive thunderstorms to develop while temperatures fall back towards the seasonal normal.

CAL OES ACTIVATIONS

Cal EOC Incident – 2014 Drought

- The SOC is activated at Level 2 in support of the Drought State of Emergency from 0800-1700 hours daily.
- The Inland REOC is activated at Level 2 from 0800-1700 Monday through Friday or as needed.
- The Southern REOC is activated at Level 1.
- The Santa Barbara County OA EOC is activated at Level 2 to be handled by the duty officer for the purpose of monitoring activities and gaining situational awareness. The operational period is Monday – Friday, 0800-1700 hours.

Situational Summary

On January 17, 2014 Governor Edmund G. Brown proclaimed a State of Emergency and directed state officials to take all necessary actions to prepare for drought conditions. The State Operation Center (SOC) is activated to implement objectives in support of the Governor's priorities. The lack of winter rain and snowfall has resulted in extremely dry conditions in many parts of the State. Reservoir levels are down significantly from where they should be on average for this time of year. If conditions continue severe impacts to municipal water supplies, agriculture (plants and livestock) and firefighting capabilities are likely in store for the State over the next few months. Negative economic impacts will also result.

The drought could result in severe impacts to the municipal water supplies, wells, agriculture (plants and livestock) and firefighting capabilities for several months. The SOC continues to be activated to monitor the situation statewide, and support regional and local operational areas.

- On 7/8/14 the State Water Board will publicly release proposed water conservation requirements to reduce water waste across the state. These proposed emergency regulations include mandatory restrictions on water use, and will be considered by the Water Board on 7/15/14.
- California Department of Fish and Wildlife staff evacuated trout from a major hatchery on the American River last week to avoid a massive die-off of fish due to increased water temperatures in the hatchery. Over two million fish are being relocated and released earlier than normal due to drought conditions.
- The Taskforce continues to meet regularly to take actions that conserve water and coordinate state response to the drought.
- Cal OES continues to gather drought-related costs from state agencies and local governments.

Situational Summary

Open Burn Ban in effect across the state: Open burning is now prohibited on 31 million acres of land across the state, due to a burn ban that CAL FIRE has directed each of its unit chiefs to implement. This ban on open burning in state responsibility areas (outside of cities and towns) reduces wildfire danger amidst extremely dry conditions.

The National Weather Service provided the following synopsis for the relationship of Blowing Dust Advisories and the drought conditions in southeast California: Dust storms are common due to increased thunderstorm activity and the winds produced with these storms, during monsoonal flows. The severity of the dust storms could be locally exacerbated by drought conditions. In any event, the public should monitor NWS for any advisories and warnings issued by NWS.

On July 1 2014, administration of the CDPH Drinking Water Program (DWP) transferred to the California State Water Resources Control Board (SWRCB) Division of Drinking Water. CDPH and the SWRCB entered a Memorandum of Understanding outlining a three-month transition period during which drought response activities and any other emergencies will be coordinated jointly between the two organizations.

CAL OES MISSIONS

Ongoing Cal OES Missions

- **2014-LAW-2798**, El Dorado County is planning an in-county SAR exercise on 07/15/14 for their volunteers and have requested the assistance of the California National Guard (CNG) aviation assets to support the exercise. Elements of the exercise will include an orientation to the various CNG air assets (H72, H60 and CH47), hoist training, patient packaging for air evacuation and ground team insertion and extraction training.
- **2014-LAW-2481**, The 95th CST will provide area monitoring, secure communications, and WMD expertise for the NHRA Racing Event at Sonoma Raceway July 25-27, 2014. They will assist with advanced planning and be pre-positioned prior to the start of the event.
- **2014-LAW-2483**, The 95th CST will provide area monitoring, secure communications, and WMD expertise for the IRL Racing Event at Sonoma Raceway August 22-24, 2014. They will assist with advanced planning and be pre-positioned prior to the start of the event.

Mission:

We protect lives and property, build capabilities, and support our communities for a resilient California.

We achieve our mission by serving the public through effective collaboration in preparing for, protecting against, responding to, recovering from, and mitigating the impacts of all hazards and threats.
